Express Checkout – Coming Soon!

When collecting feedback from our customer base, one of the key user experience improvements that we could make was to offer a secure in-system credit card processing option. We are excited to announce that in the coming months, we will roll out a more streamlined checkout process while continuing to offer a wide range of payment methods.

What can you expect?

- **Policy Change –** We'll soon require a credit card on file to actively bid on our site for improved user experience. Some benefits are:

    - **Streamlined Checkout** – CTBIDS Buyers will no longer have to input credit card information with each purchase. By simply having a card on file, when you win an item, we'll process that on file payment and send you the receipt.

    - **Time Advantage** – With in-system credit card processing, you'll no longer have to worry about invoice deadlines.

When will we make this change?

We are in the testing stage currently and will continue to roll out updates to our customers as we progress with timeline. You can expect to get updates through in-system messaging, direct email, and announcements on the CTBIDS.com homepage.

Thank you to all of our customers for your continued feedback on how to improve your bidding experience!

Thank you,
CTBIDS Support
